

# Great Questions ... Deserve Answers.

## Is It REAL?

We challenge you to tell the difference! **TuFFGraSs**® synthetic grasses are engineered to look and feel just like natural grass. Though many try, NO other product is as soft or looks as real!

It can be installed virtually anywhere, under most conditions, and saves you the time and expense of maintaining a natural lawn.

**TuFFGrass**® synthetic grasses are built using proven technology and designed from the ground up to mirror natural grass. The soft texture and bluegrass color of our polyethylene blades could

easily fool Mother Nature herself. To achieve our grass' lush, natural look and feel, the blades are generously lock-stitched into a porous double-layer backing for durability and longevity.

## How long will it last?

**TuFFGraSs**® blade and backing materials were developed to withstand the rigors of aggressive sports play which speaks for their durability.

**TuFFGraSs**® installations are designed to optimize the form and function of your project site; handling heavy payloads or lots of traffic.

Properly installed and maintained,

**TuFFGraSs**® synthetic grasses can remain beautiful and enhance your yard for many years.

## Is it SAFE for seniors, children & pets?

**YES!** **TuFFGraSs**® is ideal for daycare and community centers; indoor or outdoor projects on native soils or hardscape, such as, concrete or asphalt. Improve drainage, reduce maintenance and insects; increase availability and use.

Romping children and pets have a blast on our grass!  
**It's a brilliant surface for any play area!**

## Will it fade? Can it stain?

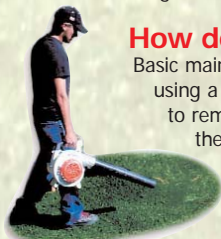

Built into all **TuFFGraSs**® synthetic grasses are UV stabilizers you'll never have to reapply. They shield the blades from sun damage under extreme conditions.

Spills can easily be cleaned using water, vinegar, de-greasers or any type of safe, biodegradable, household cleaner. The color stays true, even if you use bleach, full strength!

## How do we clean it?

Basic maintenance is as easy as using a leaf blower or grooming rake to remove leaves and loose debris from the surface of the grass. If drinks or food are spilled on it, clean up any solids, and simply rinse the area thoroughly. You can even use weed killers, disinfectants, deodorizers or enzyme cleaners with confidence on **TuFFGraSs**®.

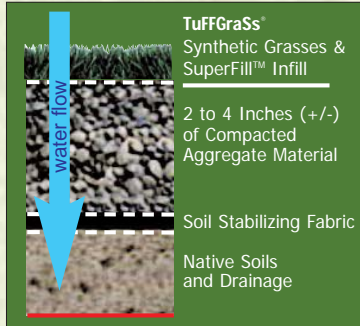

## Will it drain well?

**Absolutely! Over 6 gallons an hour!**

**TuFFGraSs**® synthetic grasses drain vertically and provide you the most flexibility for your design.

We can help you **improve** drainage problems with professional project planning and sound construction techniques.

## How Is It Installed?

**TuFFGraSs**® synthetic grasses are one part of a well-planned system, integrated to suit YOUR site's needs.

Professionally and permanently installed surfaces will always include infill. **SuperFILL™**, an acrylic coated granule, is *our choice*.

MSDS at:  
[www.superfill.net](http://www.superfill.net)

**SuperFILL™** is non-flammable, contains no harmful chemicals to leech or out-gas; it's dust-free and helps your **Grass Surfaces LAST 20 - 30% LONGER.**

## Why choose TuFFGraSs®?

**TuFFGraSs**® sets the quality standard for professional quality synthetic grass projects.

In any side by side comparison, no other is as soft or looks as real. But that's only half your solution. Building your project to deliver years of enjoyment is where your choice of construction partners makes a world of difference.

**TuFFGraSs**® delivers like no other.
